

Bridge Towers

Overview

A bridge tower (German: Brückenturm) was a type of fortified tower built on a bridge. They were typically built in the period up to early modern times as part of a city or town wall or castle. There is usually a tower at both ends of the bridge. During the 19th century, a number of bridge towers were built in the Gothic Revival style – Tower Bridge in London is perhaps the best known example; ho. FunctionThese towers were built in pre-medieval and to guard access to the bridge and to enable the charging of on important crossing rivers, usually near towns and cities. The rivers were often part of the defe. • The Halebija Tower the Tara Tower on the at, Bosnia and Herzegovina (completed 1567)• The Old Town and Lesser Quarter bridge towers on the in.
