

Burkina Faso Explosion-proof Distribution Box Standard Number

Overview

BXM (D) 8030 Explosion-Proof Corrosion-Resistant Distribution Box, designed for hazard zones, ensures safe power control and prevents ignition risks. The enclosure is formed by die-casting aluminum alloy or welding carbon steel or stainless steel. Aluminum alloy/carbon steel surfaces feature high-pressure electrostatic powder coating, while stainless steel surfaces have a brushed finish, ensuring corrosion resistance and aging resistance. It is widely used in industries such as oil & gas, chemical plants, offshore platforms, and dust hazardous environments. This explosion-proof electrical panel. BXM (Explosion Proof) Distribution Box is a standard distribution box for Heat Trace Cable b of electricity antifreeze, using a hanging or vertical box structure, power cable entry at the bottom of the box, IP54 protection Level, a variety of air circuit breakers are installed, with leakage. BX51 Standard Explosion-Proof Distribution Box delivers safe power control and distribution in explosive-prone environments. 31 IEC60079-0 IEC 60079-1 IEC 60079-7 IEC 60079-31 1.
