

## Cable tray node labeling

### Overview

According to the 2011 National Electrical Code, it is imperative to label the cable tray with the wording “Service Entrance Conductors”. Cable trays containing conductors over 600 volts are required to be marked “Danger - High Voltage - Keep Away”. This standard specifies the requirements for nonmetallic cable trays and associated fittings designed for use in accordance with the rules of the Canadian Electrical Code (CEC) Part 1, and the National Electrical Code® (NEC). Covers construction and test requirements for. us-trations without notice. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. The B-Line series Cable Tray Manual was produced by our technical staff. For proper installation, design, and maintenance, adherence to international standards is essential.
