

Can an SC fiber optic patch cord be directly connected to a router

Overview

It is a 'standard' single-mode fiber cable with an SC-APC connector at the end. You can't 'really' connect it directly to a random consumer router in most cases - it's meant to go into an optical fibre device. To connect your fiber optic cable to a router, ensure you have the following: Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). I do have SC ports at the wall. Wow, your ISP wired your whole house for free with the most expensive type of connector / cable possible?

That's insane! It's problematic, since I will have to pass a really long Ethernet wire from the router to the switch. Most ISPs use a GPON or XGPON. A fiber optic patch cord (fiber jumper) is: Typical applications: A patch cord is the "bridge" that connects two fiber devices and lets them talk to each other.
