

Cost of laying fiber optic cables on highways

Overview

The cost to install fiber optic cable ranges from \$1.50 to \$42 per foot, with installation costs accounting for 60-80% of total project expenses. According to the Fiber Broadband Association's 2025 report, median costs are \$8 per foot for aerial builds and \$18 per foot for. Fiber optic cables consist of multiple fibers, each designed for high-speed data transmission. These fibers are thin strands, often as small as a human hair, that transmit data as pulses of light. This guide presents typical price ranges in USD to. Buyers typically pay for fiber laying by combining material costs, labor time, and permitting plus trenching or aerial support fees. Finally. Whether you're wiring a single building or laying fiber across a larger property, knowing the key factors that influence the final cost will help you budget accurately and avoid surprises.
