The invention discloses a distribution box dehumidification and anti-condensation device, comprising a shell, an elastic buckle belt and a solar cell panel, wherein a vertical slide track is arranged in the shell, a through hole is formed in the vertical slide track, a fan is. WS-ZNCS-111 anti-condensation control device uses advanced semiconductor refrigeration components for refrigeration and dehumidification, no refrigerant, no compressor, environmental protection and energy saving. It is mainly used in switch cabinets/husbandry control cabinets and terminal boxes. To address this industry pain point, the 150W Intelligent Dehumidifier (Aluminum Dehumidifier) was developed to solve the problem of condensation inside electrical cabinets at the source through active dehumidification. Enjoy ✓ Free Shipping Worldwide! ✓ Limited Time Sale ✓ Easy Return. Through dehumidification measures, humidity can be effectively reduced to prevent moisture absorption of insulation materials, electrical flashover, corrosion of metal parts, and mold generation, thereby maintaining the normal operation of equipment and the safety and reliability of the power. The Intelligent Dehumidification Device (Condensation-Type Dehumidifier) is designed for electrical equipment cabinets. Utilizing advanced semiconductor refrigeration technology, it rapidly condenses moisture in the air and drains it through a conduit, effectively reducing the absolute humidity. Application: dehumidification of power and communication cabinet, dehumidification and anti condensation of box, dehumidification and anti condensation of armored high-voltage cabinet, dehumidification by wind power, dehumidification and anti condensation d...
