A Toneable Flat Drop Cable is a type of fiber optic drop cable used in the last-mile section of a fiber-to-the-home (FTTH) or fiber-to-the-premises (FTTP) network. What makes it “toneable” is the inclusion of a metallic (usually steel or copper) locating wire, which allows the cable to be detected. Optical fiber drop cable, often referred to as FTTH (Fiber to the Home) cable, is the last segment in the fiber optic network, which connects the user's home/building terminal to the backbone cable terminal of an ISP provider.
