

Fiber Optic Cable Connection Control Panel

Overview

A fiber patch panel is a structured solution for organizing and managing fiber optic cable connections in a network. These panels offer designated connection points for cables, keeping them neatly routed, easily accessible, and protected from damage. NG4access[®] Cabled Modules available in all module sizes and fiber counts up to 864 fibers NG4access[®] Splice Tray Four sizes of interchangeable Propel fiber pass-through adapter packs provide the breadth of capabilities for virtually any configuration. Cisco's 1RU, 2RU, and 3RU SMF and MMF panels Figure 2. With the comprehensive Rosenberger OSI product range, you find the answer for almost every aspect of fibre optic cabling: fibre optic connectivity systems from the universal standard connector LC to the highly specialised expanded beam connector, fibre optic patch cords, equipment connection cords. Fundamentally, a fiber patch panel is a device with multiple ports for fiber-optic connectors.
