

Fiber optic switch with 6 fiber ports and 2 electrical ports

Overview

This TCP/IP extended managed switch has two 100BASE-FX ports for fibre optic and six 10BASE-T/100BASE-TX ports for copper cable. It is a network switch with a supply voltage of 12V to 48V, a power consumption of 12W and maximum number of switches in a ring is 50. This product offers you a smart and. Hardened Ethernet equipment with superior reliability, long MBTF, redundant power support, wide operating temperature range, EDI, EMI, RFI and surge protection. Our hardened products are required to pass stringent real-time data transfer testing at the temperature from -40° to $+85^{\circ}\text{C}$ for up to 72. The EL100-2U series includes unmanaged Ethernet switches with 6/7/8 ports designed for 10/100 MBit/s data transfer. These switches provide flexibility with optional up to six RJ45 Ethernet ports and up to four optical ports, compatible with both multimode (MM) and singlemode (SM) fiber optic. VERSITRON's SG70660 6 port unmanaged switch has 4 ports of 10/100/1000M Ethernet with RJ45 ports and 2 slots for 1000Base Gigabit SFP fiber modules. Our model SG70660 supports small- and mid-sized multimode, single-mode, and single-fiber cable networks. With distances up to 80km, it provides a 100Base-FX port combining Ethernet Switching and Fiber Optic technology to boost total network bandwidth.
