

Fiber optic switch with storage function

Overview

In the computer storage field, a Fibre Channel switch is a network switch compatible with the Fibre Channel (FC) protocol. This switch offers state-of-the-art analytics and telemetry capability built into its next-generation Application-Specific Integrated Circuit. A Fiber Channel SFP is a specialized optical transceiver designed exclusively for Fiber Channel (FC) networks, enabling high-speed, low-latency, and lossless data transmission in Storage Area Network (SAN) environments. Fiber-optic switches are optical switches in the context of fiber optics. This technology offers significant. VERSITRON manufactures a wide range of fiber optic switches that provide links for your 10Base, 100Base, 1000Base Gigabit, and 10 Gigabit networks simultaneously.
