

Fireproof sealant for vertical cable trays

Overview

Service penetration seals are passive fire protection systems designed to maintain the fire resistance of building element or section - wall or floor - where services such as cables, cable trays, pipes or ventilation ducts pass through them. Effective protection of cable systems around the world: our tried-and-tested FLAMMOTECT-A and DG-CR 0.7 products are successfully used to protect cables in high-rise buildings, industrial buildings, and offshore facilities as well as in sensitive areas, such as hospitals, airports, production. Pyroplex Pressure Exerting Sealant expands multi-directionally when exposed to elevated temperatures, exerting pressure to seal and prevent the passage of fire and smoke through service penetrations. The sealant is designed for use around cable tray and bunched cable applications. Pyroplex Pressure. The KBS ® fire protection portfolio includes a wide range of fire protection products of the highest quality that reliably prevent the spread of fire in an emergency and thus permanently meet building code requirements. The vast number of different building materials and.
