

High-precision overseas warehouse for smart city terminal boxes

LoRa handheld portable base station

Overview

It is an international joint venture by DP World and industrial engineering specialists SMS Group that aims to change the way that containers are handled in ports with smart innovation. The patented rack structure delivers the same capacity as a conventional terminal using only a. From temperature-sensitive goods to hazardous materials, our specialised warehousing offers secure, tailored storage for products that need extra care. By. BOXBAY implements an autonomous, eco-friendly and sustainable solution which sets a whole series of new standards. The high-bay storage system fulfills a wide range of requirements and has been designed with much responsibility and consideration for the people who work in the ports or live in. While many ports are undergoing digital transformation and can be classified as smart ports, only a few have consistently combined automation, artificial intelligence, sustainability, and data integration into a functioning ecosystem. 20 December 2024

- 8 min read Over 80 percent of global trade's goods are transported by sea. Ports are the heart and soul of this global economy, especially as international. Innovative high-bay container warehouses, stacking steel boxes up to 60 meters high, promise not only a threefold increase in capacity on the same footprint but also a reduction in land use of up to 70 percent. However, this technological evolution is far more than just a construction project – it.
