Overview

Specs: Features 2 to 16 ports (e., 4, 6, 12), typically single mode (G652D), with an IP68 rating for water and dust resistance—capable of submersion up to 1 meter for 30 minutes. A Multiport Service Terminal is a hardened, environmentally sealed enclosure that provides multiple pre-connectorized output ports (typically 4, 8, 12, or 16) for drop cables, while accepting a single incoming feeder or distribution cable. The Transmission Control Protocol (TCP) and the User Datagram Protocol (UDP) only need one port for bidirectional traffic. Known interchangeably as an MST box or fiber MST. Connect Terminal to the internet via Ethernet and add up to three USB accessories, like a cash drawer or bar code scanner.
