

Inquire about AOC active optical cable SFP

Overview

Our AOC portfolio spans 10G SFP+ to 400G QSFP-DD with DDM support and reach up to 100m over multimode fiber. Active Optical Cables (AOCs) have emerged as a powerful solution, combining the benefits of optical fibers with traditional cabling systems. AOC provide high bandwidth over long distances while maintaining low latency This article will delve deeper into the criteria for selecting AOCs with Small. A 10G SFP+ AOC offers a straightforward, high-performance means of interconnecting two 10-gigabit ports—efficiently and without the complexity of separate optics and fiber. : For a larger view, simply click on the image. The QSFP DD AOCs operate up to 25Gb/s NRZ modulation and provide solutions up to 200Gb/s aggregate bandwidth, supporting 100meters. AOC stands for Active Optical Cable. It integrates an optical cable of a specified length with two optical modules to form a convenient transmission channel, and the cable length can be customized according to customer application requirements. The structure of the SFP AOC is shown below: Figure 1. As data center and enterprise network demands continue to grow, 10G SFP+ AOC cables —also known as 10G SFP+ active optical cables or simply 10G AOC cables —have become the go-to solution for high-speed, low-latency interconnects.
