

Is the switch costing over 20 000 yuan the core component

Overview

The switching engine is the core component of the switch, responsible for data forwarding and routing. It processes data packets from various ports and forwards them to the correct output ports based on destination address information. Having doubled sales for two consecutive years, it became only the second startup to turn a full-year profit. Against this backdrop, Leapmotor isn't just. The official unveiling of Nintendo's next-generation console, the Switch 2, not only marks a significant hardware upgrade but also represents a strategic battle within the global technology supply chain. Unfortunately, YouTuber Geekerwan has managed to get hold of a Nintendo Switch 2 motherboard. While the creator won't be able to do much with the hardware, since it is just a board with some circuits and chips, he did. I was always under the impression that nintendo is happy with its position on the console market and picks older chips on purpose. It makes the final product cheaper which leads to bigger profit.
