

## Join the SFP core switch

### Overview

Holding the SFP module by its sides, insert the SFP module into the port on the switch. I am following the CBT Nuggets CCNA course and am trying to connect all my equipment up. In regards to the core switches, I have 2 X 3750v2 switches acting as core 1 and core 2. Are there any alternatives to this that don't. I am considering purchasing a SFP+ Core switch ('WS-C4500X-16SFP+' - it has 16 x 10 GE SFP+ port only - no RJ45) and then want to connect this to a 1G CISCO switch (WS-C3850-48P-S) with an SFP+ uplink module. The "Edge-to-Core" connection should be 10Gbps. (The connections to the clients will be. BiDi SFP modules, also known as BiDirectional Small Form-factor Pluggable modules, are optical transceivers used in fiber optic networks. These modules are capable of transmitting and receiving data over a single strand of fiber cable, enabling bidirectional communication.

Interconnection Options for Gigabit Switches with SFP Ports

When you connect two 1000BASE-T switches with SFP ports to achieve Gigabit Ethernet, there are two methods: through standard Ethernet cable plugged into the built-in Ethernet

Connecting Core to Access switches

You could also run fiber between SFP modules. I would recommend at least 2 copper runs per switch, which you can then put in a port channel, so that you have 2 Gbps of uplink for all of

Solved: Core Switch

Pretty simple, you just plug the optical transceiver into the switch port for that transceiver type. Of course, this assumes you're using the correct transceivers and fiber between the devices

networking

For short-distance links on a gigabit switch (where all ports are Gigabit) it makes, no, zip, zero, nada, (etc) difference if you use SFP ports or wired ports to interconnect switches. SFP ports
