

Mauritius Fiber Optic Communication Cable Blowing Project

Overview

Mauritius will strengthen its broadband connectivity through the deployment of a new fiber optic submarine cable carried by Mauritius Telecom. The telecoms infrastructure for which the incumbent operator has obtained the green light from the government should be completed. The Republic of Mauritius is a small island state with an upper middle income economy and a population of 1.3 million inhabitants, is located in the Indian Ocean. The country has a strong reputation for its vibrant democracy, political stability and ease of doing business and has undergone major. Electrum, in close collaboration with ATML, has successfully designed, supplied, and installed over 50,000 last-mile fiber optic drop cables for the largest telecom operator in Mauritius and Rodrigues. The products are utilized across the 'last mile' of datacom, telecom and security applications. Photonics also offers technical advice with regards to fibre optic procurement. Cable installation by using high speed air flow combined with additional mechanical pushing force is called as “blowing or jetting”.
