

# Mexican Standard Height of Distribution Boxes

## Overview

It describes HA, HK, and LGD series boxes with dimensions ranging from 100-415mm in length, 105-323mm in width, and 75-140mm in height. The standard pallet size in Mexico is 1016 mm x 1219 mm, which is exactly 40 inches x 48 inches. It's widely recognized in North American logistics, making it ideal for cross-border trade. To make. There are standardized measurements of pallets according to different classifications, including the one elaborated by the ISO (International Organization for Standardization). This height also safeguards the box from potential water spills or accidental impacts. Adhering to these guidelines during the installation of a distribution box ensures. te Adient packaging requirements to the suppliers. It is the expectation of Adient that all suppliers of Direct Materials and quality relevant indirect suppliers comply with all of the requi ctronically and are available to all team members. Printed latest published packaging standards/guideline. Optimizing pallet heights provides freight, handling, and storage efficiencies. If shipping pallets greater than 50" in height, please contact your Lowe's Mexico Vendor Supply Chain Analyst.

## Article Content

### PACKAGING AND LABELING FOR DISTRIBUTION

If your product cannot be shipped on a standard pallet due to dimensional constraints, work with the Lowe's Mexico Vendor Supply Chain Analyst to determine the optimal pallet size.
