

Modular cable management module not fastened securely

Overview

An arrest mechanism should be securely fastened to each module adjacent to the gap or at the end of the row. This jump is often given extra UV and abrasion protection by using some type of split loom or “snake skin” covering. With the combination of First Solar's Series 6 modules and the tracker, wire management holes on the module provide the perfect route from the drive train to avoid potential failure points. but its not patched?

Yeah, not patched yet here in the pics. From patch notes, and keeping. Installation of the cable management system (CMS) for models of Terra x3 (23/53), Terra x4 (24/54/54HV), Terra xx4 (94/124/184) with charging cable configurations C, CG, CC, CJ, JJ, CCT, CJT. Many of the recommendations in this guide are general best practices for all solar. Our various cable management options, such as cable managers or wire basket channels, offer an orderly and easy placement of cable harnesses and electrical conduits on the roof. All options are easy and quick.
