

Non-standard electrical distribution boxes require certification

Overview

Distribution box certification typically requires compliance with IEC 61439 5 for low-voltage assemblies, UL 50/508A 6 in North America, EN 61439 in Europe, and GB 7251 7 in China. CE certification is a mandatory safety mark for products stipulated by EU law. For metal distribution boxes, CE certification means that the product has been tested and evaluated in accordance with relevant EU directives and meets the basic requirements of the EU for safety, health, environmental. Additionally, we offer Listing and Recognition certification for enclosure accessories to assist manufacturers who utilize Type or IP rated enclosures, for example, Types 3R and 4X or IP55 and IP66. This enables you to use Type or IP rated enclosure accessories such as access hardware hinging and. There are two types of electrical installation work – prescribed and non-prescribed for which a Certificate of Electrical Safety (COES) is required.
