

Rack-level micro-module products

Overview

Rack-based modular systems bring together IT racks, cooling units, service enclosures, and monitoring tools into a single, cohesive package. Designed for edge locations and distributed IT applications, these compact systems enable IT teams to deploy remote infrastructure with. Supermicro is developing leading liquid cooling technology powering the world's most ambitious AI infrastructure projects. 5kW Edge Infrastructure with Integrated Backup Cooling for Remote and Space-Constrained Environments What Makes a Micro Data Center the Ideal Solution?

A micro data center is a compact, self-contained infrastructure solution that integrates compute resources, storage, power. The Racks manufactured out of steel sheet punched, formed, welded and powder coated with highest quality standards under stringent ISO 9001 Manufacturing & Quality management system to ensure highest quality product. Standard for Racks configuration will be welded ultra rigid frame with 4 No. Built on industry-standard, RESTful Redfish APIs from Distributed Management Task Force (DMTF) and open-source. With features of simple design, quick deployment, strong adaptability and preset equipment. Non-professionals can be in place to use the micromodule Key Features A small data center (MDC) is a small data center architecture designed for workloads with the all-encompassing facility of a large data.

Supermicro Rack-Scale Solutions Overview

Supermicro's L11 rack scale integration process not only includes the design, assembly, configuration and testing of each server at the node and rack level, but also involves simultaneous testing of all

Supermicro Total Rack Scale Liquid Cooling Solutions

Supermicro provides total rack scale liquid cooling solutions from hardware to software. Supermicro delivers a completely tested solution, including servers, racks, networking and liquid cooling

SUPERMICRO RACK SCALE LIQUID COOLING SOLUTIONS

The Supermicro CDU integrates 2 hot-swappable and redundant pumping modules and power supply modules, guaranteeing nearly a 100% uptime to the operator. The CDU has cooling capacity of up to

Micro data center | kepber

A small data center (MDC) is a small data center architecture designed for workloads with the all-encompassing facility of a large data center mounted on a single 19-inch rack.

MICRO DATA CENTER

ArcTiv Technologies is a global data center & IT solutions provider delivering high-performance products to Power, Protect, Cool and Connect your critical network infrastructure.

Compact Rack-Level Micro Module with Integrated Electrical Cabinet

Our main products are server/IT racks, integrated Micro modular data center smart cabinet, cold/hot aisle containment, UPS, PDU, precision air conditioning, precision power distribution, etc.
