

Samoa Level 3 Distribution Box Standard Components

Overview

Typical product includes the following components, enclosure electrical mounting parts electrical devices, busbars, cables, connecting terminals, and label. The enclosure is made of welded cold-rolled or stainless sheet steel with a thickness ranging from 1. The ABB MNS® low voltage distribution board and power cabinet are a new set of modular and multipurpose low-voltage products. As a member of the ABB MNS family, this particular product is widely used in the lower-level power distribution facilities with MNS® low-voltage switchgear in the following. MNS is a low-voltage switchgear assembled in the factory using standard modules. It is suitable for AC 50/60Hz, rated operating voltage below 660V, and rated current up to 6300A in power distribution systems, used for power distribution, conversion, control, and reactive power compensation. The system shows a light alarm, placed in the front of the box, and an acoustic buzzer.
