

## What router is best for a 20Mbps fiber optic connection

### Overview

The best router for fiber internet is one that matches your plan speed, home size, and how you use your connection. Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. This table should be useful so you can compare each of my top picks and see the differences in their features, price, and suitability. Some popular options include:

1. TP-Link Archer AX6000: With its advanced features and high-speed. Future-proofing improves network longevity since Wi-Fi 6E and Wi-Fi 7 routers support advanced devices and higher speeds. Reliable connectivity, swift downloads, and strong coverage are within. A good router designed for fiber-optic connections will remove bottlenecks, maintain stable speeds, and provide reliable coverage throughout your home or office.
