

## Where are electrical distribution boxes located in Sweden

### Overview

The major distribution centers in Sweden are Stockholm, Gothenburg, and Malmo. Stockholm is the capital and the business center of the country with a metropolitan area population of about 2 million. The Swedish national grid for electricity consists of approximately 16,000 km of power lines, about 175 substations and switching stations and connections to other countries. Our society places high demands on a safe and reliable electricity supply. Critical societal functions such as railroads. ABB offers a total ev charging solution from compact, high quality AC wall boxes, reliable DC fast charging stations with robust connectivity, to innovative on-demand electric bus charging systems, we deploy infrastructure that meet the needs of the next generation of smarter mobility. Distribution substations connect to the transmission system and lower the transmission voltage to medium voltage ranging between 2 kV and 33 kV. The new Electrical Safety Act comes into force on 1 July 2017. Suitable for indoor and outdoor use.
